Fill Room Operator - Charlotte, NC

The ideal **Fill Room Operator** candidate will have proven experience providing accurate and safe maintenance, analysis, and/or filling of compressed and liquefied cylinder gas products. Responsibilities and requirements may include all or portions of the below tasks:

- Handle, maneuver, load, unload and organize high pressure and cryogenic cylinders.
- Perform detailed and specific maintenance repairs, valve insertions, and valve removals.
- Perform required testing, analysis, inspections and requalification of cylinders.
- Ensure acceptable cylinder appearance through proper painting and labeling.
- Safely operate cylinder maintenance, analysis, and mechanical loading (forklifts, hand carts, pallet jacks) equipment.
- Commit to high performance through outstanding attendance and overall dependable work habits.
- Adhere to company policies and procedures as well as local, state and federal regulations and laws.
- Ability to lift 100 pounds.
- Non-sedentary, repetitive physical handling of cylinders in a non-smoking environment.
- High school education or equivalent.
- Class A or B CDL or the ability to obtain is required.
- Ability to obtain hazmat, tanker and air brake endorsements is required.
- Excellent driving record and if selected, ability to pass pre-employment screenings.
